MEMORANDUM FOR: National Intelligence Officer for Africa  
FROM: Director of Central Intelligence  
SUBJECT: USSR and the Situation in South Africa

Thanks for your supplemental points on Soviet activities with respect to South Africa. I think your comments are more to the point than the original talking points. Could you take the best of both and get it into a one or two page memo for me to send to Bud McFarlane which would start out saying something like this: "In response to the President's question at last week's NSC meeting on South Africa, I pulled together the information we have on how the Soviets are weighing in on this situation."

William J. Casey
